
1 Article Replication
The article
Input data
Target data (its results)
or
The article
Input data
The authors' code (in any language)
Are all its methods available in Julia packages?
No
Implement the missing methods in Julia
Yes
Replicate the article
compare the results with the target data or the authors' code
Replication Records
article, data, targets, Julia code, full or partial, differences
2 Method Packaging
if new methods were written
Create a method package
tests: input data against target data, within tolerances
Write a vignette
Publish to the Pollis Registry on GitHub
Library 1
Method Packages
each referencing its article
3 Workflow Extraction and Combination
Extract the workflow
inputs, outputs, parameters and the order of the procedures; no article data
Library 2
Workflows
single and combined
take
add
Combine workflows
procedures from two or more into a new one
supply the methods that workflows use
always
optional
kept as a library or record
